Teaching Mathematics for the 21st Century Linda Huetinck 2008 This third edition of Teaching Mathematics for the 21st Century continues to help teachers let the secret out—to open up to their students the wonderful discoveries and challenges of the pattern-making and problem-solving aspects of a fascinating subject: mathematics. The rationale remains the same—to enable prospective and current teachers to access and use tools and strategies to effectively teach mathematics to contemporary students. Changing

demographics, knowledge of how people learn, and technology all impact the way we educate our young people. This edition incorporates lessons and strategies from programs that have proven success in many types of classrooms. Many of these examples help students connect mathematics to real life situations and communicate their understanding of the underlying concepts. Although technology is constantly being upgraded, ways to increase student motivation through its application remains a goal. For example--since applets can enhance a lesson whether the teacher uses a computer projector, a "smart" board, or has students work individually on computers--we have identified several sources of mathematics applets that can be correlated to various lessons. Research citations and summaries have been updated to reflect current information on teaching and learning. For future teachers.

How to Create and Use Rubrics for Formative Assessment and Grading Susan M. Brookhart 2013-01-01 What is a rubric? A rubric is a coherent set of criteria for student work that describes levels of performance quality. Sounds simple enough, right?

Unfortunately, rubrics are commonly misunderstood and misused. The good news is that when rubrics are created and used correctly, they are strong tools that support and enhance classroom instruction and student learning. In this comprehensive guide, author Susan M. Brookhart identifies two essential components of effective rubrics: (1) criteria that relate to the learning (not the "tasks") that students are being asked to demonstrate and (2) clear descriptions of performance across a continuum of quality. She outlines the difference between various kinds of rubrics (for example, general versus task-specific, and analytic versus holistic), explains when using each type of rubric is appropriate, and highlights examples from all grade levels and assorted content areas. In addition, Brookhart addresses * Common misconceptions about rubrics; * Important differences between rubrics and other assessment tools such as checklists and rating scales, and when such alternatives can be useful; and * How to use rubrics for

formative assessment and grading, including standards-based grading and report card grades. Intended for educators who are already familiar with rubrics as well as those who are not, this book is a complete resource for writing effective rubrics and for choosing wisely from among the many rubrics that are available on the Internet and from other sources. And it makes the case that rubrics, when used appropriately, can improve outcomes by helping teachers teach and helping students learn.

Modern Educational Measurement W. James Popham 2000 This time-honored work provides the most useful tools for accurate assessment of students and how well the goals of curricula are met in this thorough re-orientation of Modern Educational Measurement. Overhauled to approach the topic from the perspective of the people in the trenches who must master the uses and abuses of testing methods and assessment instruments, this book offers timely, well-documented, and extremely practical information on this important subject. Further, it presents the material in a way that makes it more interesting and engaging than other texts on the market. In addition, the author's personal, engaging, and humorous writing style brings the subject matter to life and helps readers maintain their interest in the material. The book aims to help educational leaders, the administrators and the teachers who must grapple with the problems and the methods of assessment in order to improve educational practices for students everywhere. Follows a logical and developmental framework that takes readers from a general overview of the significance of assessment in education, to a discussion of how to evaluate the usefulness of different measurement strategies, to hands-on advice on how to construct accurate and effective assessment instruments, to a perceptive overview of the dos and don'ts of the field. Designed for anyone interested in Educational Measurement and Evaluation, Assessment, and Testing.

Learning Personalized Allison Zmuda 2015-02-10 A real-world action plan for educators to create personalized learning experiences
Learning Personalized: The Evolution of the Contemporary Classroom provides teachers, administrators, and educational leaders with a clear and practical guide to personalized learning. Written by respected teachers and leading educational consultants Allison Zmuda, Greg Curtis, and Diane Ullman, this comprehensive resource explores what personalized learning looks like, how it changes the roles and responsibilities of every stakeholder, and why it inspires innovation. The authors explain that, in order to create highly effective personalized learning experiences, a new instructional design is required that is based loosely on the traditional model of apprenticeship: learning by doing. Learning Personalized challenges educators to rethink the fundamental principles of schooling that honors students' natural willingness to play, problem solve, fail, re-imagine, and share. This groundbreaking resource: Explores the elements of personalized learning and offers a framework to achieve it Provides a roadmap for enrolling relevant stakeholders to create a personalized learning vision and reimagine new roles and responsibilities Addresses needs and provides guidance specific to the job descriptions of various types of educators, administrators, and other staff This invaluable educational resource explores a simple framework for personalized learning: co-creation, feedback, sharing, and learning that is as powerful for a teacher to re-examine classroom practice as it is for a curriculum director to reexamine the structure of courses.
