Great Plains Birds Larkin Powell 2019-11 The Great Plains is a well-known and well-studied hybrid zone for many animals, most notably birds. In Great Plains Birds Larkin Powell explores the history, geography, and geology of the plains and the birds that inhabit it. From the sandhill crane to ducks and small shorebirds, he explains migration patterns and shows how human settlements have affected the movements of birds. Powell uses historical maps and images to show how wetlands have disappeared, how grasslands have been uprooted, how rivers have been modified by dams, and how the distribution of forests has changed, all the while illustrating why grassland birds are the most threatened group of birds in North America. Powell also discusses conservation attempts and how sporting organizations have raised money to create wetland and grassland habitats for both game and nongame species. Great Plains Birds tells the story of the birds of the plains, discussing where those birds can be found and the impact humans have had on them.

Save Mozambique's Elephant Coast:recreat John Perrott 2007-06 The author meets entrepreneur Jim on a 1988 North Pole adventure, discover they are both Africa enthusiasts. Returning from a waspish over the Andes pipeline experience in 1995, Jim recruits him for Africa to produce a feasibility study to obtain a 40,000 acre Indian Ocean look-alike San Francisco Peninsula development offered personally by Mozambique's President. The project goes through several near death experiences, end up an inimitable world class international tourist destination project. Jim has the largest wildlife refuge development by private enterprise on record, a 914 Sq Mi wildlife ecotourism development which safeguards the UN's botanically diverse region. But Jim fails to develop it, dies in 1999. The author now targets recruiting a billionaire or Disney to fund expanding to 4000 Sq Mi to connect to the nearby 38,500 Sq Mi worlds' largest wildlife refuge, to provide range to save 5000 Kruger elephants slated for mercy killing for overgrazing.

Traveler's Tool Kit: Mexico and Central America Rob Sangster 2008-02-28 Traveler's Tool Kit Mexico/Central America was named Best Guidebook for 2008 by planeta.com Rob Sangster and Tim Leffel are not typical travelers, nor is this a typical travel guide. Instead of rating Mexico's "best" (read: most expensive) hotels, the authors shows how to locate comfortable, affordable lodging anywhere in the country. Traveler's Tool Kit does the same for everything from dining to entertainment to sightseeing in Mexico, Guatemala, Costa Rica, Belize, Panama, Honduras, Nicaragua, and El Salvador. Individual sections cover it all: drafting itineraries, calculating costs, eco-sensitive travel, unusual tours, managing money, staying healthy, woman-alone travel, and much more. Sangster and Leffel show how to connect with a network of travelers who've discovered the most enjoyable things to do and can provide guidance on how much to pay for them. The book also tells how to memorialize the adventure through photography and blogging, and even how to earn money from the trip after returning home. Sangster and Leffel are both authoritative and encouraging, drawing on years of experience to help travelers maximize the fun, savings, and security without compromising quality.

Africa Overland Siân Pritchard-Jones 2009 Be vigilant when driving through Africa: camels are careless when crossing the road, and women carrying waterpots are little more watchful. So warn the authors of this fifth edition of Africa Overland. They also give updated information on each country's political and security situation (Angola, Sierra Leone and Liberia are on the up; since this guide's last edition, security in Western Sudan and Eastern Chad has turned sour); provide an expanded Route Outlines section including information on border crossings; and offer revised recommendations on vehicles including practical coverage on buying a vehicle, maintenance and driving. ?This is the ultimate roadies' guide to traversing the wilderness of Africa. An indispensable guide to negotiating the uncharted perils of Africa's vast plains.' Daily Express (UK)

Birdfinder Jerry A. Cooper 1995 This book is based on the premise that birders can successfully plan to find a vast number of species of birds in North America, as long as they are armed with information about where to go, when to go, and what to expect. Birdfinder outlines nineteen key trips designed to produce a list of over 650 species in North America. Jerry Cooper makes this possible both economically and efficiently. Cooper summarizes the Key, Possible, Probable, and Remotely Possible birds to be seen on each of the nineteen trips, with details on transportation, accommodations, special equipment, and the birdfinding guides you will need. The specialties and key species for each of these trips are outlined in detail. This is a planning guide, illustrating a strategy for successful North American birdfinding. If you have

unlimited time, you can follow the whole itinerary, trip after trip, in chronological order. Most birders, however, will pick and choose among the nineteen trips to suit the times they are free to travel. In either case, your birding experiences and lifelist will benefit greatly. Each of the nineteen trips in Birdfinder has at least one map to highlight the birding route. Another important feature of this guide is a special chart summarizing all the species to be seen on these major trips. As a bonus, an additional "Baker's Dozen" locations are included in a special chapter. Birdfinder: A Birder's Guide to Planning North American Trips will serve the dedicated birder as an essential companion to regular birdfinding guides.

Conservation Education and Outreach Techniques Susan K. Jacobson 2015-09-03 The conservation of biological diversity depends on people's knowledge and actions. This book presents the theory and practice for creating effective education and outreach programmes for conservation. The authors describe an exciting array of techniques for enhancing school resources, marketing environmental messages, using social media, developing partnerships for conservation, and designing on-site programmes for parks and community centres. Vivid case studies from around the world illustrate techniques and describe planning, implementation, and evaluation procedures, enabling readers to implement their own new ideas effectively. Conservation Education and Outreach Techniques, now in its second edition and updated throughout, includes twelve chapters illustrated with numerous photographs showing education and outreach programmes in action, each incorporating an extensive bibliography. Helpful text boxes provide practical tips, guidelines, and recommendations for further exploration of the chapter topics. This book will be particularly relevant to conservation scientists, resource managers, environmental educators, students, and citizen activists. It will also serve as a handy reference and a comprehensive text for a variety of natural resource and environmental professionals.
