Good Economics for Hard Times Abhijit V. Banerjee 2019-11-12 The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, Good Economics for Hard Times makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

India's 2014 Elections Paul Wallace 2015-07-07 India is now governed by a strong Modi-led majority party. A peaceful transference of power in terms of parties and structure as a consequence of India's 16th national election highlights a notable degree of political maturity. The replacement of the Congress-led coalition after 10 years with a Bharatiya Janata Party clear majority is one obvious result of what can be considered a historic election. As a consequence of the 2014 elections, the emergence of a strong leader and a strong party coupled with continuing regionalism may provide a version of the state-nation system. It remains to be seen to what extent the new political structure coupled with India's diversity will shape society, politics and governance during the next five years. Rich in empirical and quantitative data, this volume, along with the four previous volumes, comprise the best set of national- and state-level studies for understanding India's politics in depth.

Getting India Back on Track Ashley J. Tellis 2014-06-09 India has fallen far and fast from the runaway growth rates it enjoyed in the first decade of the twenty-first century. In order to reverse this trend, New Delhi must seriously reflect on its policy choices across a wide range of issue areas. Getting India Back on Track broadly coincides with the 2014 Indian elections to spur a public debate about the program that the next government should pursue in order to return the country to a path of high growth. It convenes some of India's most accomplished analysts to recommend policies in every major sector of the Indian economy. Taken together, these seventeen focused and concise memoranda offer policymakers and the general public alike a clear blueprint for India's future. Contents Foreword Ratan N. Maharashtra Human Development Report 2012 Yashwantrao Chavan Academy of Development Administration 2014-04-30 The present Maharashtra Human Development Report (MHDR) 2012 keeps the spirit of the Eleventh and Twelfth Five Year Plans of 'faster, sustainable and more inclusive growth' at the core of its analysis. MHDR 2002 was the state's first effort in focusing on the prevailing human development scenario in the spheres of growth, poverty, equity, education, health and nutrition. Since then the state has come a long way in the last decade, achieving near-complete enrolments at the primary school level, a wide coverage of health infrastructure and initiation of new incentives, to name a few. The 2012 Report goes beyond being just a situation-analysis of the current human development scenario to a more analytical exercise in facilitating a deeper understanding of what and where the inequalities are, how capabilities can be enhanced, what has been the progress, where the shortfalls are and where the thrust of efforts to promote human development should be. Recognizing the centrality of inclusive growth processes to human development, the need to study human development outcomes disaggregated by gender, rural-urban, regional and social groups is the focal point of this Report. The outcome would be the identification of specific human development goals, evidence-based policy recommendations and directions to how those excluded from the growth and human development processes can be included to reap the benefits of the same.

School Choice International Rajashri Chakrabarti 2009 Analyses and studies of public-private partnerships in education and the varied forms they take in different parts of the world. Public-private partnerships in education exist in various forms around the world, in both developed and developing countries. Despite this, and despite the importance of human capital for economic growth, systematic analysis has been limited and scattered, with most scholarly attention going to initiatives in the United States. This volume helps to fill the gap, bringing together recent studies on public-private partnerships in different parts of the world, including Asia, North and South America, and Europe. These initiatives vary significantly in form and structure, and School Choice International offers not only comprehensive overviews (including a cross-country analysis of student achievement) but also detailed studies of specific initiatives in particular countries. Two chapters compare public and private schools in India and the relative efficacy of these two sectors in providing education. Other chapters examine the use of publicly funded vouchers in Chile and Colombia, reporting promising results in Colombia but ambiguous findings in Chile; and student outcomes in publicly funded, privately managed schools (similar to American charter schools) in two countries: Colombia's "concession schools" and the United Kingdom's City

Academies Programme. Taken together, these studies offer important insights for scholars, practitioners, and policymakers into the purposes, directions, and effects of different public-private educational initiatives. Contributors Felipe Barrera, Cristian Bellei, Eric P. Bettinger, Rajashri Chakrabarti, Geeta G. Kingdon, Michael Kremer, Norman LaRocque, Stephen Machin, Karthik Muralidhara, Thomas Nechyba, Harry A. Patrinos, Paul E. Peterson, Ludger Woessmann

Inclusive Finance India Report 2014 Tara S. Nair 2015 Inclusive Finance India Report 2014 presents in-depth research and analysis on financial inclusion with evidence on the decisive shift in the positioning of microfinance within the financial system of India. Following up on Microfinance State of the Sector Report 2013 by the authors, this year's report focuses on recent developments in inclusive financing and efforts by governments and banks in extending financial services to the unbanked and underbanked regions and populations. The report tracks the progress of financial inclusion initiatives across institutional structures and delivery models, including the main microfinance channels. It contributes to an understanding of the complexities of the financial inclusion process, reviews policy development on inclusive finance, and highlights key challenges and opportunities for diverse stakeholders. A comprehensive reference on annual trends and progress of financial inclusion and the microfinance sector, the report synthesizes data and inputs from the Reserve Bank of India, NABARD, Ministry of Finance, banks, apex financial institutions, technology services providers, sector experts, and resource agencies. It serves to provide a perspective on the practice of financial inclusion in India as well as informing the policy formulation process.

Papers in Strengths Based Practice Venkat Rao Pulla 2012 Papers included in this volume are from various parts of the world and were presented at Kathmandu in 2012 as part of the conference of Brisbane Institute of Strengths Based Practice. This volume titled as "Papers in Strength Based Practice" is an endeavour to raise the question of how to keep hope and move beyond mere survival to proactive positive change within the practice of social work and human service.

Saber-tooth Curriculum J. Abner Peddiwell 1939 "A classic of educational criticism proves its relevance in light of today's educational quandaries First published by McGraw-Hill in 1939, The Saber-Tooth Curriculum was a groundbreaking satire of the educational establishment, and its unwillingness to adapt to changing times. Throughout the decades, this witty work has not only become an educational classic, but has also remained as relevant and applicable to the key questions in education today as it was when first published. With tongue firmly in cheek, Peddiwell takes on the conflicting philosophies of education, from its imagined origins at the dawn of time to its culmination in a ritualistic, deeply entrenched social institution with rigidly prescribed norms and procedures. Developed within a fanciful framework of fictional lectures, given by fictional author Professor J. Abner Peddiwell, doyen in the History of Education at Petaluma State College, this humorous fable illustrates the progress of education and gives valuable insights into how it could continue to develop in the decades to come."--desc. of new 2004 ed., via amazon.ca.

Agricultural Statistics 2020 U S Dept Of Agriculture 2021-12-31 Agricultural Statistics is published each year to meet the diverse need for a reliable reference book on agricultural production, supplies, consumption, facilities, costs, and returns. Its tables of annual data cover a wide variety of facts in forms suited to most common use. The estimates for crops, livestock, and poultry made by the U.S. Department of Agriculture are prepared mainly to give timely current state and national totals and averages. They are based on data obtained by sample surveys of farmers and of people who do business with farmers. The survey data are supplemented by information from the Census of Agriculture taken every five years. Being estimates, they are subject to revision as more data become available from commercial or government sources. Unless otherwise indicated, the totals for the United States shown in the various tables on area, production, numbers, price, value, supplies, and disposition are based on official Department estimates. They exclude states for which no official estimates are compiled. Extensive data includes statistics for the following: -Grain and Feed -Cotton, Tobacco, Sugar Crops, and Honey -Oilseeds, Fats, and Oils -Vegetables and Melons -Hay, Seeds, and Minor Field Crops -Cattle, Hogs, and Sheep -Dairy and Poultry -Insurance, Credit & Cooperatives -Agricultural Conservation & Forestry -Consumption & Family Living -Fertilizers & Pesticides Miscellaneous Agricultural Statistics such as Foreign Agricultural Trade Statistics including exports, fisheries and more. Professionals in the following fields to include farmers, ranchers, soil conservationists, surveyors, agricultural economist consultants, livestock manufacturers, livestock feedlot operators, food distributors, animal scientists, food chemists, food brokers, farm and land appraisers (and more) may have the greatest interest in this volume.

International and Comparative Employment Relations Russell D Lansbury 2020-07-25 'The most comprehensive and authoritative comparative analysis of employment relations . . . ' Thomas Kochan, Massachusetts Institute of Technology, United States ' . . . breaks new ground as an integrated account of the forces shaping employment relations.' William Brown, University of Cambridge. United Kingdom Established as the standard reference for a worldwide readership of students, scholars and practitioners in international agencies, governments, companies and unions, this text offers a systematic overview of international employment relations. Chapters cover the United Kingdom, United States, Canada, Australia, Italy, France, Germany, Denmark, Japan, South Korea, China and India. Experts examine the context of employment relations in each country: economic, historical, legal, social and political. They consider the roles of the major players: employers, unions and governments. They outline the processes of employment relations: collective bargaining and arbitration, consultation and employee involvement. Topical issues are discussed: non-unionised workplaces, novel forms of human resource management, labour law reform, multinational enterprises, networked organisations, differences between Asian and Western companies, small and medium-sized enterprises, migrant workers, technological change, labour market flexibility and pay determination. This sixth edition is fully revised with an emphasis on

globalisation and comparative theories, including concepts of convergence. It offers a new framework for varieties of capitalism in the Introduction, and concludes with an insightful account of the forces shaping employment relations in the world economy.

Estimating the economic impacts of the first wave of COVID-19 in Pakistan using a SAM Multiplier Model Moeen, Muhammad Saad 2021-02-13 Social Accounting Matrix (SAM) multiplier analysis has been employed to assess the impacts of COVID-19 on various macroeconomic variables including Gross Domestic Product (GDP), employment, and poverty in Pakistan. SAM multiplier models are well-suited to estimate the direct and indirect effects of unanticipated demand-side shocks and short-term fluctuations on various sectors and agents in the economy, such as those caused by the COVID-19 pandemic. The results show that Pakistan's GDP declined by 26.4 percent from mid-March to the end of June 2020 (14 weeks) compared to a non-COVID scenario. Services were hit the hardest, registering losses of 17.6 percent, followed by industry with losses of 6.7 percent. Agriculture turned out to be resilient and remained relatively unhurt, falling by 2.1 percent. All households witnessed a reduction in incomes, but higher-income quartiles appeared to have lost more than lower-income ones. Our approach for economic impact with mitigation measures is to assess the effectiveness of Emergency Response Packages (ERP) by altering the remittances to levels that reflect the magnitude of the support from the government. The total government expenditures were directed towards different kinds of households of PKR 318.6 billion (USD 2.12 billion). This led to a reduction of about USD 3.1 billion in GDP losses, which, compared to the amount spent implied a multiplier of 1.4 in GDP per PKR spent. The national poverty rate soared to 43 percent and 38.7 percent in April and May respectively. The Government's cash transfers program proved highly effective and led to 11 percent reduction in poverty rate during the pandemic. The recovery scenarios indicate a cumulative GDP loss of USD 11.8 billion and 11.1 USD billion under slow and fast recovery scenarios, respectively, by December 2020. Our estimates show that Pakistan's annual GDP (at market prices) will register a decline of 4.6 percent in the year 2020 due to negative effects of the pandemic and sluggish economic recovery. Poverty is expected to stabilize at 27.6 percent and 27.4 percent for the two recovery scenarios by December 2020.

Banking Law and Practice Hong Kong Institute of Bankers (HKIB) 2012-09-04 A solid understanding of how banks operate is crucial to grasp the functioning of modern society. Banks are an intrinsic part of business, finance, and everyday life. Modern banking is regulated by a sophisticated set of laws and regulations that are constantly evolving. Banking Law and Practice from the Hong Kong Institute of Bankers outlines and explains these laws and regulations clearly and in detail. This regulatory framework has a deep impact on banks, bankers, and anyone that deals with them, which is the overwhelming majority of society. This high level of impact makes Banking Law and Practice an important book as well as a necessary and authoritative reference for industry professionals, students, and the public at large. Banking Law and Practice discusses a range of topics that have a direct bearing on the day-to-day operations of banks, from contracts to how to ensure safe and secure lending. It examines the development and current state of banking legislation and regulation and facilitates bankers and their institutions to shape their practice to meet all the necessary legal and regulatory requirements. Students, industry professionals, and the public at large will welcome the thorough and clear explanations of the legal and regulatory framework in which banks operate. This book is essential reading for candidates studying for the HKIB Associateship Examination and anyone else seeking expert knowledge of the legal and regulatory structure affecting banks in Hong Kong. Topics covered in this book include: Contractual Relationships Code of Banking Practice Money Laundering Negotiable Instruments Law Related to Securities Bankruptcy and Insolvency

The Japanese Economy and the Way Forward Rameshwar Tandon 2005 This book explains the causes of the "lost decade" in the Japanese economy and the series of policy mistakes which lead to a deflationary environment. What will the future bring for the Japanese economy? Without reforms, the situation can only decline. The issue is that the institutions and policies that were used to drive the "Japanese miracle" are still in place. The book argues that Japan's crisis is thus a crisis of governance.

Socio-Economic Change and the Broad-Basing Process in India M. V. Nadkarni 2019-06-18 This book offers a new concept of inclusion of the marginalised in India — the Broad-basing Process. The author examines how through this process increasing numbers of marginalised social groups can enter into the social, political and economic mainstream and progressively derive the same advantages from society as the groups already part of it. The book critically reviews how the broad-basing process has worked in the past in India both before and after its independence. It examines how social groups like Dalits, OBCs, Muslims, women and the labour class have fared, and how far economic development, urbanisation, infrastructure development and the digital revolution have helped the marginalised and promoted broad-basing. It also offers mechanisms to speed up broad-basing in poorer economies. A first of its kind, this volume will be useful for scholars and researchers of political studies, sociology, exclusion studies, political economy and also for general readers.

A Political History of the World Jonathan Holslag 2018-10-25 A three-thousand year history of the world that examines the causes of war and the search for peace In three thousand years of history, China has spent at least eleven centuries at war. The Roman Empire was in conflict during at least 50 per cent of its lifetime. Since 1776, the United States has spent over one hundred years at war. The dream of peace has been universal in the history of humanity. So why have we so rarely been able to achieve it? In A Political History of the World, Jonathan Holslag has produced a sweeping history of the world, from the Iron Age to the present, that investigates the causes of conflict between empires, nations and peoples and the attempts at diplomacy and cosmopolitanism. A birds-eye view of three thousand years of history, the book illuminates the forces shaping world politics from Ancient Egypt to the Han Dynasty, the Pax Romana to the rise of Islam, the Peace of Westphalia to the creation of the United Nations. This truly global approach enables Holslag to search for patterns across different eras and regions, and explore larger questions about war, diplomacy, and power. Has trade fostered peace? What are the limits of diplomacy? How does environmental change affect stability? Is war a universal sin of power? At a time when the threat of nuclear war looms again, this is a much-needed history intended for students of international politics, and anyone looking for a background on current events.

A Short Treatise on the Wealth and Poverty of Nations (1613) Antonio Serra 2011 Although no less an authority than Joseph A. Schumpeter proclaimed that Antonio Serra was the world's first economist, he remains something of a dark horse of economic historiography. Nearly nothing is known about Serra except that he wrote and died in jail, and his Short Treatise is so rare that only nine original copies are known to have survived the ravages of time. What, then, can a book written nearly four centuries ago tell us about the problems we now face? Serra's key insight, studying the economies of Venice and Naples, was that wealth was not the result of climate or providence but of policies and strategies for competitively developing some economic activities rather than others, particularly manufactures, subject to increasing returns to scale and a large division of labour. Through a very systematic taxonomy of economic life, Serra then went on from this insight to theorize the causes of the wealth of nations and the measures through which a weak, dependent economy could achieve worldly melioration. At a time when leading economists return to biological explanations for the failure of their theories, the Short Treatise can remind us that there are elements of history which numbers and graphs cannot convey or encompass, and that there are less despondent lessons to be learned from our past. Serra's remarkable treatise is introduced by a lengthy and illuminating study of his historical context and legacy for the theoretical and cultural history of economics and for the economic strategies of nations.

Managing the Macroeconomy Ramkishan S. Rajan 2015-08-04 While offering many growth-enhancing opportunities, India's ever-increasing integration with the world economy has given rise to a host of new challenges in managing the economy. This book provides an up-to-date empirical assessment of some of India's crucial policy challenges pertaining to its monetary and external sector management.

Managing the Risks of Extreme Events and Disasters to Advance Climate Change Adaptation Christopher B. Field 2012-05-28 This Intergovernmental Panel on Climate Change Special Report (IPCC-SREX) explores the challenge of understanding and managing the risks of climate extremes to advance climate change adaptation. Extreme weather and climate events, interacting with exposed and vulnerable human

and natural systems, can lead to disasters. Changes in the frequency and severity of the physical events affect disaster risk, but so do the spatially diverse and temporally dynamic patterns of exposure and vulnerability. Some types of extreme weather and climate events have increased in frequency or magnitude, but populations and assets at risk have also increased, with consequences for disaster risk. Opportunities for managing risks of weather- and climate-related disasters exist or can be developed at any scale, local to international. Prepared following strict IPCC procedures, SREX is an invaluable assessment for anyone interested in climate extremes, environmental disasters and adaptation to climate change, including policymakers, the private sector and academic researchers.
