Light Therapies Anadi Martel 2018-05-15 A comprehensive guide to the therapeutic benefits of light and color and how they affect our physical and psychological well-being • Shares scientific research on how different wavelengths of light influence our cells, brain function, sleep patterns, and emotional stability • Examines several forms of light therapy, including chromotherapy, heliotherapy, actinotherapy, and thermotherapy • Explains how to use light and color therapy, maximize the benefits of sunlight, and avoid the health risks of new light sources such as compact fluorescents and LEDs Beginning with sun worship in prehistory and sunshine therapies in ancient Egypt, Greece, and India, light has long been associated with the sublime, the divine, and healing. Yet only recently have we begun to understand how different parts of the light spectrum, from infrared to ultraviolet, can affect our physical and psychological well-being. Covering the historic, scientific, and spiritual aspects of light and its role in energy medicine, Anadi Martel explores the vibrational nature of light and the interaction between light, biology, and consciousness. He demonstrates light's incredible effects on the physical, energetic, and cognitive dimensions of life and examines several forms of light therapy, including chromotherapy (color therapy), heliotherapy (sun therapy), actinotherapy (ultraviolet therapy), and thermotherapy (infrared therapy). He details how to use light therapy daily, get optimal benefits from sunlight, and avoid the health risks of new artificial lighting such as compact fluorescents and

LEDs. Combining his own 30 years of research with practical insight from the many phototherapy pioneers he's encountered, the author examines scientific studies on how specific wavelengths of light influence our cells and DNA, brain function, sleep patterns, and emotional stability; speed the healing of wounds; and are effective in the treatment of disease, including arthritis, stroke, Alzheimer's, Parkinson's, and brain and nerve injuries. Exploring the spiritual aspects of light, the author explains why auras and halos have been used to represent sages and saints of all traditions, revealing the intimate link between light and consciousness. Investigating the many laser, monochrome, audiovisual, and infrared machines designed to heal disease and treat emotional disorders, Martel also reveals promising medical applications for light that are currently in development, inviting the reader not only to appreciate the complexities of light but to maximize its therapeutic dimensions.

The Spirit Book Raymond Buckland 2005-09-01 The fascinating history of Spiritualism is coaxed into the material realm as the object of this perceptive and sweeping overview by that legendary author of the occult and supernatural, Raymond Buckland. Containing more than 500 entries and 100 illustrations, The Spirit Book is the comprehensive encyclopedia to Spiritualism and its related subjects. Plus it provides full biographies of every prominent person connected to the field. Drawing on decades of research, writing, and transcendence, Buckland describes sundry methods of channeling, events associated with Spiritualism, including séances and exorcism, organizations focused on clairvoyance, and a colorful host of mortals—famous and infamous—who delved into Spiritualism. Nostradamus, Helena Blavatsky, and Edgar Cayce receive their due, as well as Joan of Arc, William Blake, Susan B. Anthony, Winston Churchill, Arthur Conan Doyle, Mahatma Gandhi, Harry Houdini, and Mae West (look up and see her sometime). It explores Qabalah, Sibyls, Fairies, Poltergeists; phenomena such as intuition and karma; objects useful in the attempt to cross the divide, including tarot cards, flower reading, and

runes; and related practices such as Shamanism, transfiguration, meditation, and mesmerism.

Color Secrets Michelle Lewis 2022-09-16 Many experts dive deep into the field of color psychology - with incredible books that show color's theory, history and science. But they've missed one of the most important truths of color as it relates to human beings: That color itself is a language. It activates more of our brain than any spoken word! And it spans time, countries and cultures. Having studied color in science, behavior, nature, film, music, history, culture, religion and healing; Color Psychology Expert Michelle Lewis has boldly introduced a new theory in her powerful new book Color Secrets: That color is our only universal language. The goal? For you to understand the deep meanings of color in multiple aspects, enabling you to eventually speak the language yourself. Whether it's pivoting your home environment to introduce calm and comfort - or to lead a revolution for change in your industry, color is a powerful force that exists to support our intentions. This book will help you recognize major color mistakes - like using yellow in a room that might overstimulate an overactive child, or magenta to bring peace when it's meant to incite action. Color has morphed and changed, even evolved, over time. It is more than a theory. More than a decoration. It is a presence that wants to communicate with us, inspire us and in some cases - heal us. It's so much cooler than science fiction. Color is science fact that will rock what you know about the world around you, down to your very core. It will even change how you speak. Color Secrets will show you this new - but old as time - language that everyone can use to more effectively communicate with each other worldwide. It starts by simply standing in the sun.

Light: Medicine of the Future Jacob Liberman 1990-10-01 Light: Medicine of the Future challenges the modern myth that the sun is dangerous to our well-being and claims that technological advancements, such as most fluorescent lighting, sunglasses, tanning lotions, and our indoor lifestyles, may be more harmful than helpful. Integrating scientific research, clinical experience, and his own insights, Dr. Jacob Liberman has worked effectively with more than 15,000 individuals, from the learning disabled and physically/emotionally traumatized to business executives and Olympic athletes. The book discusses the use of light in the treatment of various cancers, depression, stress, visual problems, PMS, sexual dysfunction, learning disabilities, and the human immune system.
